

1 **ASSOCIATING MULTI-LINGUAL AUDIO RECORDINGS WITH**
2 **OBJECTS IN AN INTERNET PRESENTATION SYSTEM**

3 **Abstract**

4 Methods for associating multi-lingual audio recordings with
5 visual objects in a presentation system accessed by the
6 Internet network wherein a plurality of visual objects such
7 as charts or slides controlled by a third party in a server
8 can be accessed by any user of the network. Each visual
9 object being associated with an audio recording in any
10 language selected amongst several predetermined languages.
11 In an example embodiment, the method comprises the steps of
12 calling the third party server by the user in charge of the
13 audio recording associated with a visual object via the
14 Public Switched Network, prompting the user on his telephone
15 to enter his user ID; and transmitting by the keypad of the
16 telephone the user ID including a first part defining a
17 first language to be used for recording the recording,
18 whereby displaying the visual object will be automatically
19 synchronized with the audio recording.
